

计算机动画的算法与技术——基于 GPU 的碰撞检测算法

田正祺 2020080095 软件 01

1 碰撞检测的加速算法设计

2 背景

碰撞检测通常分为宽相位碰撞检测（broad phase collision detection）和窄相位碰撞检测（narrow phase collision detection）^[1]。宽相位碰撞检测用于快速粗略地将完全没法碰撞的物体去除掉，然后对可能碰撞的物体进行更精确的但通常更慢窄相位碰撞检测。由于预期仿真的物体（球，正/长方体，四面体）比较简单，此项目会使用简单的窄相位碰撞检测算法，而聚焦在宽相位碰撞检测。

3 GPU 实现的思路设计
